My Fitness Pal

Overview

A platform app that could record our personal health information to track whether we're keeping healthy.

My Fitness Pal builds on **Vue.js** front-end framework. Servers are based on **Java SpringBoot** and **MySQL**.

Backend endpoints

- Base host: https://still-stream-50614.herokuapp.com
  - PLEASE **DO NOT** TAKE PRESSURE TESTS! IT IS ON **PRIVATE COST**!

Login

Login service

- router: `/login`
- method: `GET`
- request body: JSON

```
{
 "id":1,
 "username":"admin",
 "password":123456,
 "email":"123@qq.com",
 "role":"Super Admin",
 "state":1
}
```

Menu

Retrieve full menus

- router: `/menus`
- method: `GET`
- request body: none

Team Fitness Pal needs your feedback

Hi pal!

Do you have a hard time trying to stay motivated in keeping healthy?
Do you want to lose weight, lower BMI and gain strength by diet and sports planning?
Stay tuned to our product, My Fitness Pal! We're trying to build a platform app that could record our personal health information to track whether we're keeping healthy and staying fit.

As we're working on our development, we would love to hear from your voice to improve our product.
We really appreciate for your help by filling out this survey.

https://docs.google.com/forms/d/e/1FAIpQLScKQhxNOddEzjqcKDjZfCu-XLiqQ3crETGeVP7_N1b8RGPlmQ/viewform

Check out our web page for latest news and features!

- Team Fitness Pal

- Progressing
  - Frontend
    - Implement a calorie indexing module.
    - Implement a sport module. Data is fixed in the frontend.
    - Align background color and text language.
  - Backend
    - Unit test.

2. Next week plan
   - Finish calorie and sport modules.
   - Adjust website design according to customers' feedback.
   - Can we make a demo for customers?

3. Improvement
   - More communications between end-to-end so that data delivered are the same.
   - Come up with ideas to attract customers.
     - Coupons for people who filled in the questionnaire?
     - Demo videos?
     - Post for new updates?
